

# SWITCHING POWER SUPPLY

ITEM NO.: 15-AC24H-2A

## OVERVIEW:

## FEATURES:

- Convert AC/DC 24V to DC12V for camera or car TFT monitor
- Built-in surge protection at AC24 input line
- 12VDC/2000mA(MAX) output

## INSTALLATION:

1. Connect power wires to input and output.
2. Green LED for working properly, Red LED for overload or input voltage low or use of abnormal.

## PACKING:

1. Power converter           ×1
2. User Manual               ×1

## CAUTION:

1. Avoid places under raining directly.
2. Avoid damage to the device; do not attempt to break the seal.
3. Avoid places where temperatures exceed 50 ° C or more.
4. Avoid places where there is a frequent vibration or shocks.
5. Only for inputting power AC/DC 24V.
6. Avoid possible shorting of the output adapter. Make all connections to the power converter before the source AC/DC 24V power input is plugged.
7. Work environment should be well ventilated.

## SPECIFICATION:

| ITEMS                      | 15-AC24H-2A                                    |
|----------------------------|------------------------------------------------|
| INPUT VOLTAGE              | AC24V (AC17 to AC28V)<br>DC24V (DC18 to DC32V) |
| INPUT CURRENT              | AC24V / 2.0A @ 100% FULL LOAD                  |
| OUTPUT POWER               | DC12V +/- 2% Regulated                         |
| OUTPUT CURRENT             | 2.0A (MAX)                                     |
| DIMENSIONS           mm    | 57.5WX32HX24D                                  |
| Weight                   g | 55g                                            |
